

Gonzalo Ríos

Director of AI Platform

Barcelona, Spain · contacto@gonzalorios.cl · gonzalorios.cl · linkedin.com/in/gonzariosm · github.com/gonzariosm

SUMMARY

Director of AI Platform at Rebrandly. My team builds the paved road for AI-assisted engineering: coding agents with the right context and permissions, automated review, guardrails and CI/CD gates, so code written with AI reaches production as safely as any other. I got here through fifteen years of DevOps and SRE. Docker, Kubernetes, Terraform and AWS are still my daily tools, and I write Go and Python to automate everything that should not need a human.

EXPERIENCE

Director of AI Platform · Rebrandly

Oct 2025 – Present

Remote from Barcelona · HQ in Dublin

- Lead a team spread across the USA, Canada, Spain, Italy, Ireland, Ukraine and Pakistan.
- Own the platform for AI-assisted engineering: coding agents with scoped context and permissions, automated review, guardrails and CI/CD gates.
- Make code written with AI reach production as safely as any other change.

Lead DevOps Engineer · Rebrandly

Apr 2024 – Oct 2025

Remote · HQ in Dublin, Ireland

- Led the team responsible for the uninterrupted operation of critical infrastructure.
- Documented and standardised the team's processes so practices are easy to follow.
- Designed and led a Go API that inserts hundreds of thousands of records into DynamoDB in under a second, key to closing deals with strategic customers.

DevOps Engineer · Rebrandly

Jun 2023 – Apr 2024

Remote · HQ in Dublin, Ireland

- Optimised CI pipelines, dramatically reducing deployment times.
- Improved resource usage and kept container images up to date.
- Introduced auto-scaling and migrated legacy services to Amazon ECS.

System Engineer · SiteHost

Aug 2021 – May 2023

Auckland, New Zealand

- Maintained a custom Docker-based container cloud running more than 15,000 containers.
- Managed Xen virtualisation and automated configuration with Ansible.
- Rolled out a Web Application Firewall and a system to filter bad traffic.
- Built tools to analyse and monitor events across thousands of servers.
- Contributed to version 1.0 of the SiteHost Terraform provider, so staff and customers deploy VPS servers as code.

DevOps & Co-founder · Silverhost Hosting Chile

Aug 2011 – Aug 2021

Las Condes, Chile

- Grew a hosting company to more than 1,000 active clients across Chile, with 500+ projects delivered.
- Combined dedicated servers, AWS and DigitalOcean into a reliable, affordable platform.
- Built tooling for malicious-traffic handling, spam monitoring and real-time malware detection.
- Ran sales, negotiation, digital marketing and SEO.

Backend Engineer · Agencia Blue

Jul 2012 – Feb 2014

Providencia, Chile

- Trained and mentored the team as the agency grew.
- Delivered sites with WordPress, Drupal and PrestaShop, then moved the agency into custom development with Silex and Symfony 2.
- Introduced DevOps: server and software configuration for custom projects.

- Installed, configured and monitored Apache, Nginx and IIS web servers, MySQL and SQL Server databases, BIND DNS, a SonicWall firewall and Cisco Call Manager VoIP.

SELECTED PROJECTS

- **AI Platform** (Rebrandly): The paved road for AI-assisted engineering at Rebrandly: coding agents, automated review, guardrails and delivery gates on one platform, so code written with AI can ship to production safely.
- **Bulk ingest API** (Rebrandly): A Golang API that writes hundreds of thousands of records into DynamoDB in under a second. It was key to closing deals with strategic customers.
- **Container cloud** (SiteHost): A custom Docker-based cloud running more than 15,000 containers, with tools to monitor events across thousands of servers.
- **Terraform provider v1.0** (SiteHost): Helped ship version 1.0 of the SiteHost Terraform provider, so staff and customers could deploy VPS servers as code.
- **Silverhost**: A Chilean hosting company built for small businesses on a budget: dedicated servers, AWS and DigitalOcean combined, with real-time malware and spam defenses.

SKILLS

- **AI**: Claude, MCP, AI agents, LLM evals
- **Languages & APIs**: Golang, Python, PHP, Bash, GraphQL, gRPC
- **Cloud**: AWS, Amazon ECS, AWS Lambda, DigitalOcean, WAF
- **Systems & containers**: Linux, Docker, Kubernetes, Xen, Nginx
- **Automation & CI/CD**: Terraform, Ansible, GitHub Actions, GitLab CI/CD
- **Data & streaming**: ClickHouse, Apache Kafka, DynamoDB, MySQL

EDUCATION

Ingeniero de Ejecución en Informática · Universidad de Ciencias de la Informática
Systems Engineering

2011 – 2013

LANGUAGES

Spanish (Native) · English (Professional working proficiency)

CERTIFICATIONS

Curso Profesional de Git y GitHub
